2. The practice of giving all children membership and inheritance rights in their father's unilineal descent group is called: A. Patrilineal B. Matrilineal C. Matrilocal D. Patrilateral
3. An exogamous, dispersed group of related lineages, often identifying themselves with an animal or symbol, is called a: A. Kindred B. Clan C. Chiefdom D. Unilineage
4. The animal, or other symbol of the group in # 3 (such symbol might be a Scotsman's plaid on his kilt), is called a: A. Clan B. Totem C. Mascot D. Two-spirit E. Nation
5. Which is TRUE about the Yanomamo that Chagnon studied?
 - A. Villages have significantly more boys under ten years of age than girls under ten.
 - B. There are no divorces
 - C. Everyone always calls everyone by the proper kinship term; no one tries to redefine relationships.
 - D. Parallel cousin marriage is the norm
6. In the book, behavior at a Yanomamo feast did NOT include:
 - a. eating until you puke
 - b. a show of generosity by the hosts, greed on the part of the guests
 - c. chest pounding duels
 - d. performance of sacred ceremonies to bring about a good harvest
 - e. eating a canoe full of plantain soup
7. Which is TRUE about the Eskimo kinship terminology system?
 - A. It distinguishes cross cousins from parallel
 - B. It reflects nuclear family residence pattern
 - C. Different terms for different lineages
 - D. Uses different kin terms for matrilineal and patrilineal sides
8. Which is TRUE of the Iroquois terminology system (and other bifurcate merging systems, too).
 - A. All adults of the parents' generation are called Mom or Dad
 - B. All cross cousins are called brother or sister
 - C. All of your aunts are called Mom
 - D. The exact same kin terms are used for relatives in both mother's lineage and father's lineage
 - E. Your parallel cousins are called brother or sister

9/10 (Better use a pencil if you have one) Here are Tom and Mary and their child Pat;
 draw in Tom's parents, Mary's parents, and a brother and a sister for Tom and for Mary.
 Now draw a spouse for each of Pat's uncles and aunts, and a son for each of the four aunt-uncle pairs. At this point Pat should have four cousins.
 Mark Pat's parallel cousins with a // sign, and cross cousins with a X sign.
 Next, darken the symbol for every individual who is in the same matrilineage as Pat.
