

## Evaluation – Objectives

Given the criteria of color, perspective, and composition, the student will rank any 10 paintings from most effective to least effective using all three criteria.

Given Grant's strategy to take Vicksburg, the student will evaluate that strategy in terms of its economy, deployability, and efficaciousness.

Given four criteria, the student will evaluate any given theory of economics using each of the given criteria.

Given five criteria and a list of 10 consumer items, the student will rank the items from best to worst using all five given criteria.

## Evaluation Objectives???

Given a list of ten consumer items, the student will identify his/her five favorite items with no more than two errors.

Given a list of ten Civil War generals, the student will explain five reasons why he/she likes one general the least.

Given five statements of life philosophy, the student will compare and contrast all five to determine which he/she agrees with the most.
